

## Recent Projects

### **Bassett Furniture Showroom Rockville, MD**

**Architect:**  
MBI K2M

**Lighting Designer:**  
Hartranft Lighting Design

Hartranft Lighting Design was hired by Bassett Furniture to provide updated showroom lighting and controls for their flagship three story 26,000 square foot showroom in Rockville, MD. The project was a collaboration with Charlotte Architects, MBI K2M, and was a first time use of LED technology for Bassett as well as a larger footprint than they had previously used. Once the design was complete, Hartranft Lighting Design also provided the manpower required to properly aim all of the lighting in the space. The Clients were pleased with the results, and have subsequently hired Hartranft Lighting Design for additional showroom projects.
