First Church of Christ Scientist Washington, DC

(Rendered images.
Construction not yet completed.)

Architect:
Kerns Group

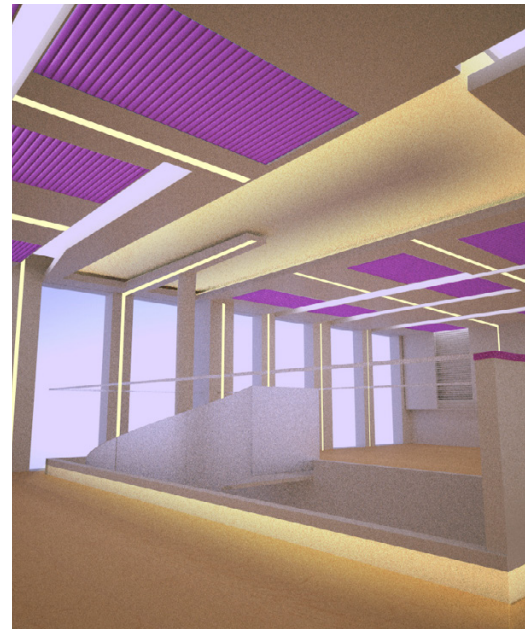

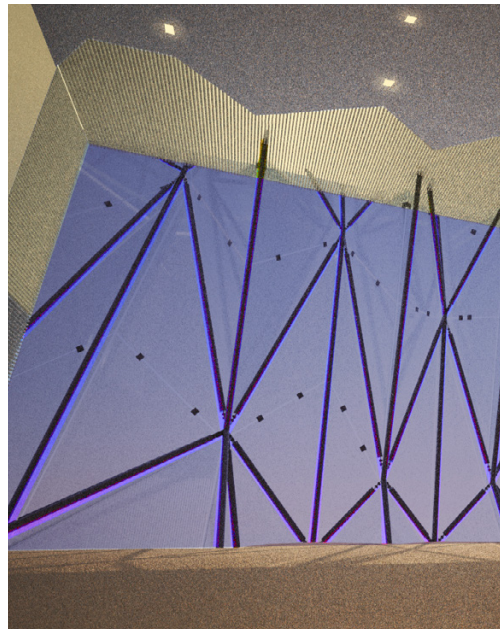

Architects Façade:
Robert A.M. Stern

Lighting Designer:
Hartranft Lighting Design

The spectacular façade had never before been lit. Its dark steel trusses are to be grazed with colored LED light, so that it is equally splendid during the nighttime hours and incorporates DMX controls to create dynamic colored effects.

The LED downlights in the auditorium space create celestial sparkle and warmth.

Modern architecture, stark finishes and bold linear forms are softened by diffuse ambient lighting, linear slot lighting in the ceiling and walls and colored accent in the facilities teaching rooms.
