Kannapolis Masterplan Town of Kannapolis Kannapolis, NC

Lighting Designer:
Hartranft Lighting Design

The masterplan for the town of Kannapolis, NC was established to create a more vibrant environment for its citizens as well as reinforcing street appeal and retail activity both day and night. The town had been mainly a textile town for many years until the town repurchased itself and set upon the road to redevelopment. The design creates diverse living spaces, each with its own feel, ranging from reflective to high energy and dynamic. Lighting is used to reinforce the mood of each space, with some lighting elements aligning with each individual identity, and some used to create a cohesive vocabulary throughout.

Hardscape, softscape and waterscape are all enhanced with integrated lighting elements and solid state technology.

The next phase will include a performance venue and sports stadium.
