PNC Diamond Club Washington, DC

Architects:

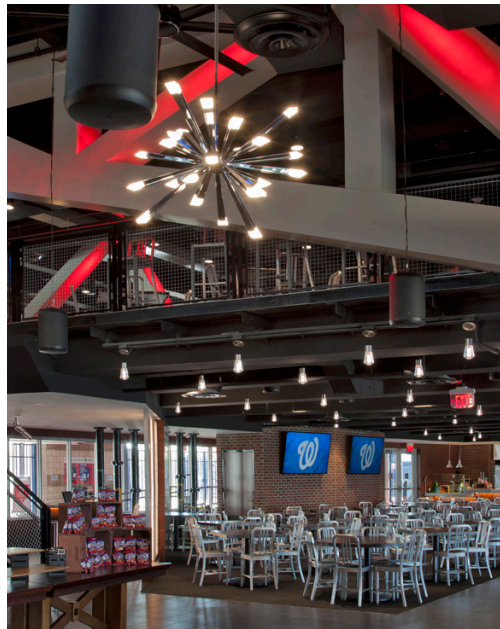

Perkowitz and Ruth Architects

Lighting Designer:

Hartranft Lighting Design

For premium ticket holders, PNC Diamond Club, located in National Park Baseball Stadium in Washington, DC, is a great place to have a meal, drink a beer and watch the game.

The owners, Lerner Company, wanted to transform the aesthetic of the space, adding the wow factor. Once again, they hired Hartranft Lighting Design, this time desiring a somewhat moody, speakeasy ambiance. The resulting design included exposed Edison bulb fixtures, industrial decorative pendants adding a bit of sparkle, back lit bars and the National's signature red-colored light highlighting the exposed support trusses zigzagging through the space.
