Stage Neck Inn York Harbor, ME

Interior Designer:
Tobey Design Group

Lighting Design:
Hartranft Lighting Design

The Stage Neck Inn is a family owned resort and conference center located on the beautiful Southern Maine Coast. Typically open year round, the entire property was closed in the winter of 2015-16 to renovate the resorts' 58 guest rooms and restaurant/banquet facilities. The entire project needed to be completed on time and budget with an aggressive four-month construction schedule.

The redesigned restaurant has a contemporary, yet coastal atmosphere, supporting dining and banquet functions. Compact LED downlighting integrated with ornamental ceiling coverings, LED lighted architectural coves and decorative accents over banquette seating and the perimeter tie the design together. A focal point of the space is a new bar. Its backlit quartz countertop glows uniformly and construction complexities are minimized by a lighting approach utilizing nearly paper thin LED light tape sheets. All of the lighting is dimmable and controlled by simple preset scenes.
