Tanger National Harbor Oxen Hill, MD

Architects:

Adams and Associates Architects

Lighting Designer:

Hartranft Lighting Design

Tanger National Harbor is a joint venture between The Peterson Companies and Tanger Outlets. Located minutes from National Harbor, this venue needed to have a much higher-end profile, requiring greater attention to design detail and added visual interest.

Hartranft Lighting Design was hired to review the initial lighting concepts and then take the lighting impact up a notch, adding dramatic lighting effects to fountains, plaza circulation paths and building facades. Tight budget restrictions were an added parameter, demanding creative, cost-efficient approaches to be devised to create an on budget and interesting environment. Hartranft Lighting Design also facilitated the rebate process, allowing the owners to stretch their budget a bit further.
